SUMMER CAMPS SPONSORED BY:

A limited number of need-based scholarships are available, limit one camp per student. Call for more details.

Photos of student participation could be taken and used in publications unless you state an objection.

CYBERCORE CAMP LEVEL 1 CAN YOU HACK IT?

July 22TH-26TH • 8am - 4pm

This program is designed for high schools students to introduce them the growing field of cybersecurity through hands-on activities and direct interaction with industry experts. Students will learn the basics of programming, circuit design, and cyber-physical systems.

CYBERCORE CAMP LEVEL 2 CAN YOU STILL HACK IT?

July 29TH - Aug 2ND • 8am - 4am

This program is designed for high school students who have a working knowledge of computing and basic programming with a Raspberry Pi.

Bring your own Pi and work on new skills with a Pi expansion kit. Learn more advanced programming and tackle bigger challenges in cryptography, web development, and network hacking and defense.

If you have not attended the Level 1 camp, please contact us via phone (208.535.5345)
